EDUCATION

Integrated M.Tech in Computer Science (Specialization in Cybersecurity)

VIT Bhopal University

Sept 2022 – Ongoing

Cumulative GPA: 8.78

SKILLS

Security	VAPT, Cryptographic Implementations, Secure SDLC, Incident Response, Network Defense Fundamentals
Programming	Python, C++, SQL, Linux Bash, Node.js
Tools	Burp Suite, Wireshark, OWASP ZAP, Nmap, Appwrite, Linux Environments (Kali/Parrot)

EXPERIENCE

Cyber Security Consultant Intern

OKOMO360 PRIVATE LIMITED

Oct 2025 – Dec 2025

On-site – Gurugram, India

- Secured a VR ecosystem through comprehensive VAPT and security hardening, mitigating 5+ critical vulnerabilities across web portals and APIs.
- Authored incident response runbooks and established foundational cloud security protocols, applying AWS security principles to fortify infrastructure and reduce response times by 15%.
- Orchestrated a secure Software Development Lifecycle incorporating OWASP Dependency-Check to remediate 3 vulnerabilities before deployment.

Cyber Security Intern

THE RED USERS

Feb 2025 – Mar 2025

Remote

- Conducted comprehensive security audits on 5+ network nodes, uncovering critical vulnerabilities and hardening firewall configurations for a 40% reduction in intrusion attempts.
- Executed VAPT on web applications to remediate OWASP Top 10 flaws and structured a defensive security framework to simulate and mitigate real-world attack scenarios.

PROJECTS

Virtual Hardware Security Module (HSM) Simulation

[GitHub](#)

- a Python-based Virtual HSM architecture ensuring 100% of cryptographic keys remain isolated within the secure boundary.
- Programmed a cryptographic service utilizing AES-256-GCM and RSA-2048 PSS with a custom Policy Engine and SHA-256 authentication.
- Created an interactive Tkinter GUI dashboard to streamline 4 core cryptographic workflows and provide real-time audit trails.

Secure Vault – Software-Based Trusted Storage Architecture

[GitHub](#)

- Engineered a hardware-inspired secure storage system implementing AES-256 encryption, SHA-256 authentication, and software-based Root of Trust mechanisms.
- Developed an encrypted vault architecture for secure storage and retrieval of cryptographic keys, API tokens, and firmware data using Python and the cryptography library.
- Implemented firmware integrity verification and secure key management workflows simulating TPM/HSM-inspired trust architecture for embedded and cloud-edge environments.

EXTRA-CURRICULAR ACTIVITIES

- **Member, Photography Team, Gujarati Club.** Captured and edited 500+ photos/videos used across the organization's marketing channels.

LEADERSHIP

- Co-Lead, Ethical Hacking Department, Cyber Warrior Club (VIT Bhopal University)- Spearheaded the development of Capture The Flag (CTF) challenges, engaging over 50 participants.
- Vice President, Eureka Club (VIT Bhopal University) – organized technical workshops, mentored students, and led innovation-focused projects.
