EDUCATION

Integrated M.Tech 5 year in Computer Science (Specialization in Cybersecurity) Sept 2022 – Ongoing
Vellore Institute of Technology *Cumulative GPA: 8.78*

SKILLS

Security	Web Application Penetration Testing, API Security Testing, VAPT, OWASP Top 10, Threat Modelling, Cryptographic Implementations, Secure SDLC, Incident Response.
Programming	Python, SQL, Linux Bash.
Tools	Burp Suite, Wireshark, OWASP ZAP, Nmap, sqlmap, Metasploit, OWASP Dependency-Check, Linux Environments (Kali/Parrot).

EXPERIENCE

Cyber Security Consultant Intern OKOMO360 PRIVATE LIMITED	Oct 2025 – Dec 2025 <i>On-site – Gurugram, India</i>
---	---

- Secured a VR ecosystem through comprehensive VAPT and security hardening, mitigating 5+ critical vulnerabilities across web portals and APIs.
- Authored incident response runbooks and established foundational cloud security protocols, applying AWS security principles to fortify infrastructure and reduce response times by 15%.
- Orchestrated a secure Software Development Lifecycle incorporating OWASP Dependency-Check to remediate 3 vulnerabilities before deployment.

Cyber Security Intern THE RED USERS	Feb 2025 – Mar 2025 <i>Remote</i>
---	--------------------------------------

- Conducted comprehensive security audits on 5+ network nodes, uncovering critical vulnerabilities and hardening firewall configurations for a 40% reduction in intrusion attempts.
- Executed VAPT on web applications to remediate OWASP Top 10 flaws and structured a defensive security framework to simulate and mitigate real-world attack scenarios.

PROJECTS

Virtual Hardware Security Module (HSM) Simulation	GitHub
--	------------------------

- Constructed a Python-based Virtual HSM architecture ensuring 100% of cryptographic keys remain isolated within the secure boundary.
- Programmed a cryptographic service utilizing AES-256-GCM and RSA-2048 PSS with a custom Policy Engine and SHA-256 authentication.
- Created an interactive Tkinter GUI dashboard to streamline 4 core cryptographic workflows and provide real-time audit trails.

JamX – Multi-Target WiFi Deauthentication Framework	GitHub
--	------------------------

- Built a Python-based wireless security testing framework using Scapy for continuous multi-target 802.11 deauthentication and disassociation attacks with automated monitor mode setup.
- Implemented channel hopping, 2.4/5GHz AP discovery, randomized spoofed MACs, and IDS-evasion techniques for advanced WiFi penetration testing.

CERTIFICATIONS

- Google:** The Bits and Bytes of Computer Networking
- AWS Training & Certification:** AWS Technical Essentials

CO-CURRICULAR

- Co-Lead, Ethical Hacking Department, Cyber Warrior Club (VIT Bhopal University)- Spearheaded the development of Capture The Flag (CTF) challenges, engaging over 50 participants.
- Vice President, Eureka Club (VIT Bhopal University) – organized technical workshops, mentored students, and led innovation-focused projects.
