EDUCATION

Vellore Institute of Technology

Sept 2022 – Ongoing

5-Year Integrated M.Tech in Computer Science (Specialization in Cybersecurity)

CGPA: 8.78

SKILLS

Security	VAPT (Web Application & API), Threat Modelling, Secure SDLC, Incident Response, Cryptographic Implementations, OWASP Top 10.
Tools	Burp Suite, Metasploit, Nmap, Wireshark, sqlmap, OWASP ZAP, OWASP Dependency-Check, Kali/Parrot OS.
Programming	Python, Linux Bash, SQL.

EXPERIENCE

Cyber Security Consultant Intern

Oct 2025 – Dec 2025

OKOMO360 PRIVATE LIMITED

On-site – Gurugram, India

- Secured a VR ecosystem through comprehensive VAPT and security hardening, mitigating 5+ critical vulnerabilities across web portals and APIs.
- Authored incident response runbooks and established foundational cloud security protocols, applying AWS security principles to fortify infrastructure and reduce response times by 15%.
- Orchestrated a secure Software Development Lifecycle incorporating OWASP Dependency-Check to remediate 3 vulnerabilities before deployment.

Cyber Security Intern

Feb 2025 – Mar 2025

THE RED USERS

Remote

- Conducted comprehensive security audits on 5+ network nodes, uncovering critical vulnerabilities and hardening firewall configurations for a 40% reduction in intrusion attempts.
- Executed VAPT on web applications to remediate OWASP Top 10 flaws and structured a defensive security framework to simulate and mitigate real-world attack scenarios.

PROJECTS

Virtual Hardware Security Module (HSM) Simulation

[GitHub](#)

- Engineered a Python-based Virtual HSM architecture to solve a SanDisk hackathon problem statement, ensuring 100% cryptographic key isolation within a secure boundary.
- Programmed a robust cryptographic service utilizing AES-256-GCM and RSA-2048 PSS, integrated with a custom Policy Engine and SHA-256 authentication.
- Designed an interactive GUI dashboard to streamline 4 core cryptographic workflows and generate real-time audit trails for compliance.

JamX – Multi-Target WiFi Deauthentication Framework

[GitHub](#)

- Built a Python-based wireless security testing framework using Scapy for continuous multi-target 802.11 deauthentication and disassociation attacks with automated monitor mode setup.
- Implemented channel hopping, 2.4/5GHz AP discovery, randomized spoofed MACs, and IDS-evasion techniques for advanced WiFi penetration testing.

CERTIFICATIONS

- Google:** The Bits and Bytes of Computer Networking
- AWS Training & Certification:** AWS Technical Essentials

CO-CURRICULAR

- Co-Lead, Ethical Hacking Department, Cyber Warrior Club (Vellore Institute of Technology, Bhopal) – Spearheaded the development of Capture The Flag (CTF) challenges, engaging over 50 participants.
- Vice President, Eureka Club (Vellore Institute of Technology, Bhopal) – Organized technical workshops, mentored students, and led innovation-focused projects.
